

Notice: School District General Fund levy is projected at 60 mills for 2013 due to legislative action to reduce property taxes with the exception of the Fargo PSD which is figured at 141.18 mills for their general fund. All other mills are projected at the 2012 rate. In addition, the legislative body approved a 12% state paid reduction reflected in the estimates.

Actual mills for 2013 will not be computed until November and will be different from what is projected at this time. The estimated tax as a percentage of true and full value can be used to provide a reasonable projected tax billing for 2013.

The Property Tax Calculator on our web site has been updated with the projected 2013 mill levies.

	Estimated Decrease in real estate tax bills from 2012 to 2013	Estimated tax as Percentage of Full and True Value
