

PROPERTY TAX SUMMARY

2015 through 2016

**PREPARED BY:
THE CASS COUNTY AUDITOR'S AND
COUNTY TREASURER'S OFFICES**

TAXING DISTRICTS

A taxing district is an entity that has the power to levy real estate taxes. Cities and townships are examples of mutually exclusive taxing districts - you are either in a city or you are in a township, not both. As a city annexes property or increases in size, the township decreases or loses that land as part of their taxable base. If a city were to dissolve, a township would gain taxable base.

Some taxing districts overlap city and township boundaries. Examples are the county, water resource districts, weed control districts, vector control districts, school districts and rural fire districts.

Some districts overlap city boundaries only if the city does not also have a corresponding district or levy. An example is the county park. The county park cannot be levied in a city where a city has an established park district and a tax levy for that district. Another example is the weed control district. The weed control district cannot levy within a city that also has a city weed control district and levies to support that district.

TAXABLE VALUATION

The **TAXABLE VALUATION** is that value to which the taxation rate is applied to calculate the amount of tax due. An assessor first sets the **TRUE AND FULL VALUE** of each taxable property in the county. For residential and commercial property, true and full is market value. For agricultural property, it's the productivity value. The assessor's values are reviewed by the local city and township boards of equalization. Those values are further reviewed by the county director of equalization who makes recommendations to the county board of equalization. The state board of equalization finalizes these values. The equalization process ensures that like property is assessed equitably across the various city, township and county boundaries.

The **TRUE AND FULL VALUE** is reduced by 50% to arrive at the **ASSESSED VALUE**. The assessed value is then multiplied by 9% to determine the **TAXABLE VALUATION** of residential property. For all other property, the assessed value is multiplied by 10% to determine **TAXABLE VALUATION**.

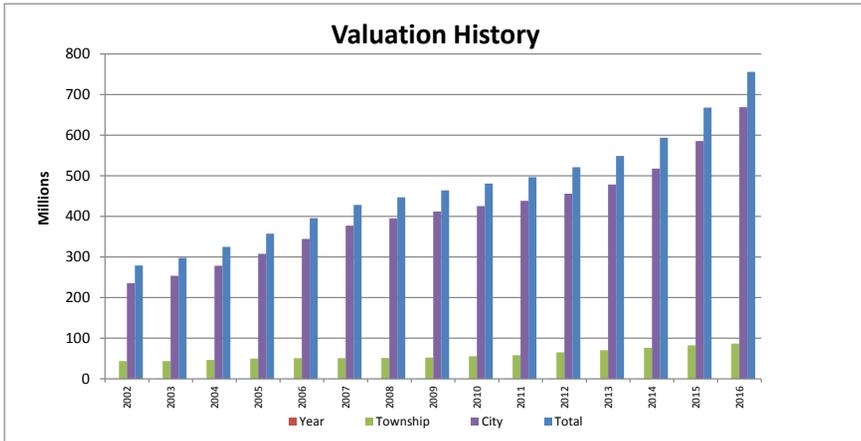

MILL LEVIES

The county auditor computes the taxation rate that is applied to the taxable valuation of each property. It is customary to refer to the taxation rate in terms of mills. The consolidated mill levy for a property is made up of the individual mill levies of each of the taxing entities where the property is located.

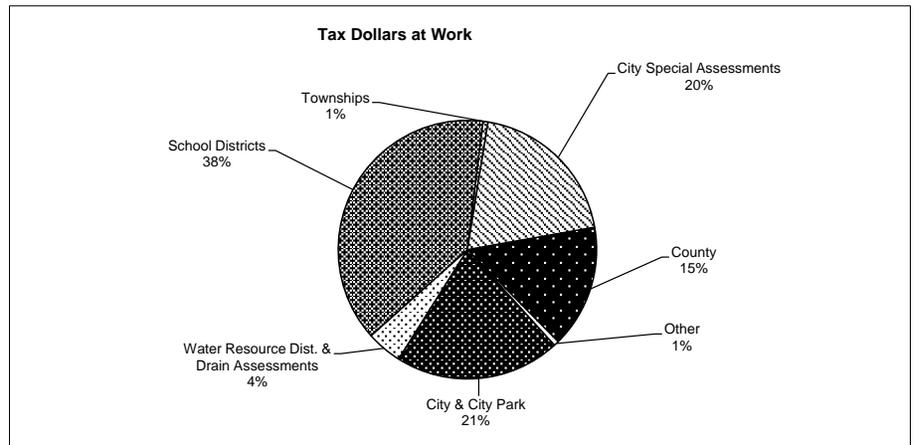

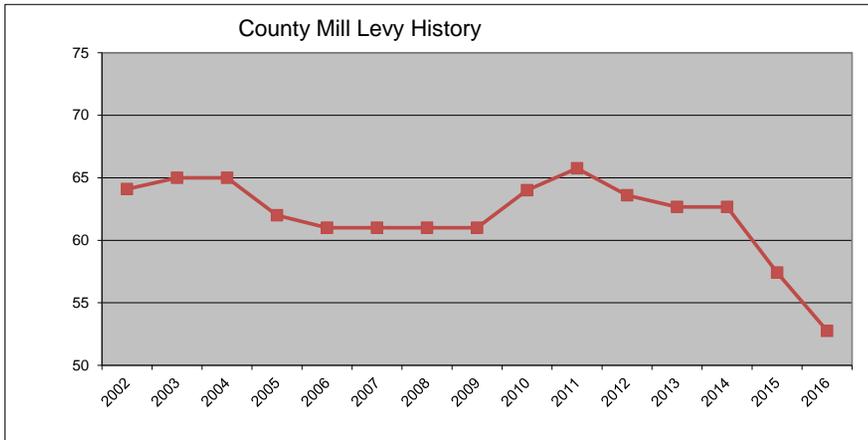

The taxation rate or mills are determined by taking the approved budget of the taxing entity and dividing it by the taxable valuation of that district. For example, the county has a taxable valuation of \$755,904,584 for the tax year 2016. The county needs to raise \$39,881,525 from property taxes to operate for the fiscal year 2017. The \$39,881,525 is divided by the taxable valuation to arrive at a rate of .05276. A mill is 1/1000 of a dollar, so .05276 equates to 52.76 (multiply by 1000).

Below is the tax computation for a residential house located in the City of Fargo and the Fargo School District:

True and full Value of Property	\$100,000.00
Assessed Value (50%)	\$50,000.00
Taxable Value (9%)	\$4,500.00
Consolidated mill levy (from page 6)	297.51
Convert to rate (divide mills by 1000)	.29751
Consolidated Tax levy (\$4,500 X .29751)	\$1,338.79
State-Paid Property Tax Relief (12%)	(160.65)
Net Consolidated Tax	\$1,178.14

Each year, in early December, the county sends out property tax statements. In 2016, these statements represent \$271 million in real estate taxes. Of this, the county levy amounts to \$41 million or approximately 15%. City levies, including city, city park and special assessments accounted for \$109 million, approximately 41%. School Districts accounted for \$104 million, approximately 38%. Other taxing district, such as townships, water resource districts, and fire districts, including the state medical levy made up the remaining 6%.
